INTERNATIONAL PHYSIOTHERAPY

WHAT IS IT AND WHO IS IT AIMED AT?

Do you want
+INFO?

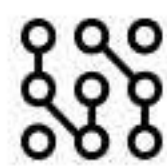

THE AIM

The aim of this course is to teach students the different aspects of **Physiotherapy** (evaluation, diagnosis, design and development of treatments) while **working** in **English** and taking advantage of the synergy between the University of Health and Sport—a centre affiliated with the University of Girona (henceforth referred to as EUSES-UdG)—and the School of New Interactive Technologies—a centre affiliated with the University of Barcelona (henceforth referred to as ENTI-UB)—to work on cross-curricular skills of academic excellence and the integration of new technologies applied to the field of Physiotherapy into the curriculum.

THE UNIVERSITY

ENTI-UB's involvement in the Bachelor's Degree in Physiotherapy will allow the students to benefit from experiences that only a **pioneer university course** in new technologies can provide: developing the tools for physiotherapeutic evaluation, applying new technological advances, and even having the possibility of **working** on the creation of new technological applications (mobile apps, computer software or 3-D modelling) in the field of Physiotherapy.

NEW TECHNOLOGIES

Nowadays, new technologies are gradually becoming increasingly prevalent in all aspects of our society and especially in the field of Physiotherapy. The physiotherapist has gone from using purely manual treatments to taking advantage of all the available technological resources, thereby both increasing the effectiveness of diagnosis as well as the results of therapies and the patient's adherence to treatment.

There are a number of devices that are often found in Physiotherapeutic centres—such as electromyographs, biomechanical sensors, force plates, instrumented treadmills, pressure measurement platforms, pressure insoles, movement capture systems, cardiopulmonary analysis systems, movement capture based on optical technology, thermography, etc.

However, not only has strictly medical technology been included, but this has also produced a synergy between different fields of the new technologies. For instance, physiotherapy can share resources with architecture (three dimensional studies of reconstruction using laser technology that have enabled us to treat pathologies associated with a deviation of the spinal column, such as scoliosis), virtual gaming (the use of the Wii Fit Board, which has changed the approach to proprioception exercises in joint injuries in ankles and knees, while developing more comfortable treatments for patients and creating more adherence and thus more assiduity and better results), and many others.

EUSES - ENTI

The symbiosis between EUSES and ENTI is therefore a natural and logical combination, especially considering that by combining both branches of knowledge students are given extra opportunities not only to broaden their learning experience but also in the use and creation of new resources for Physiotherapy. The horizons of their professional career are extended not solely in terms of their approach to health matters but also in the way they train in and think about things from an overall perspective within their academic career and their future, learning that any idea can be improved upon by thinking in a multidisciplinary way.

EUSES – ENTI students will not become mere users of new technologies but will rather gain an in-depth knowledge of them and have the capacity to know what to draw upon when creating those technological elements that are essential to their professional development and specialisation.

If we perceive a future graduate of EUSES – ENTI as an international professional, and we also add knowledge of new technologies to their studies (something which is not included at present in any university school for physiotherapy in the way that we offer it), then what we will have is a new professional who will not only add value to the care service, but will at the same time be someone who creates new resources.

The courses are **taught** exclusively in **English**. English is such an important language that mastering it is not only a requirement in today's society but a basic skill for understanding scientific production and achieving an optimal professional level.

MARIANO GACTO

Mariano GACTO (PT, PhD) is the Director of the UB-UdG Interuniversity Degree in Physiotherapy. He is also Head of the Department of Physical Therapy in EUSES – University of Girona (Campus of Salt, Girona).

He served professionally as a Physiotherapist for the Spanish and French Public Healthcare Services during six years. Academically, he graduated in Physical Therapy in the University of Murcia; he obtained an MSc in Evidence-Based Physiotherapy in Barcelona, and received his PhD with honors in Healthcare Quality Management in the University of Murcia. He also holds the lecturer Accreditation delivered by ANECA.

He has been lecturer in different PT-based subjects in EUSES, and has also developed Coordination competences prior to assuming the Direction of the Degrees.

His research areas of main interest are Healthcare Quality, Geriatrics and Psychometrics. He has published several papers in journals with high IF (Archives of Physical Medicine and Rehabilitation, European Journal of Physical and Rehabilitation Medicine, PLOS ONE, Medicine...); he has also participated in different International Congresses and is a board reviewer in JCR-indexed journals in the field of Public Health.

PROFESSIONAL CAREER OPORTUNITIES

The professional career opportunities available to a physiotherapist are extensive and varied: orthopaedics, sport injuries, paediatrics, cardio-respiratory involvement, ergonomics, neurology, uro-gynaecology, rheumatology, and so on. Physiotherapists can work autonomously or as part of a multidisciplinary team (clinics, GP's surgeries, hospitals, etc.). Teaching and professional academic development also represent a focus of great interest in the field of Physiotherapy at present. Moreover, the training that we offer will allow the student to develop professionally in the application of technology to the field of physiotherapy; an area of innovation with a great potential and an extensive spectrum for development in our society, bringing together, as it does, such relevant elements as health care and new technologies.

FREQUENTLY ASKED QUESTIONS

Why should I study at this university instead of another one?

Because these studies are **dynamic**, they focus on the **professional world** and they have the advantage of two secondary added values: the application of **new technologies**, and being taught in **English**. These will enhance the professional profile of its graduating students. This approach opens up new perspectives, providing students with a **distinguishing** and attractive feature in the context of the **European employment market**.

Is this an official degree?

Yes. It is an official university degree, issued by the University of Barcelona (a university that is a pioneer in Catalonia and with excellent standing in Europe) together with the University of Girona, allowing not only access to an excellent, top quality academic degree but also to multiple international exchange programmes, as well as the extension and continuation of postgraduate studies in other countries.

What subjects carry the greatest weight in the selectivitat (university entrance exam)?

For students coming from the Spanish educational system, it is highly recommended they access this degree after completing a health science Bachillerat, since it is based on subjects and disciplines that are similar to the fundamentals established during the first year in Physiotherapy. However, for students coming from other European or overseas educational systems, in the vast majority of cases the type or nature of previous studies is not taken into account when considering admissions, as long as applicants have the appropriate credentials.

I am British/German/French—what are the entry criteria?

As stated in Section 2.4 (“Entry criteria”), admission of students from the European Union is based on whether or not they hold an acceptable credential, which transfers and validates the qualifications gained in the educational systems in the rest of Europe: Allgemeine Hochschulreife in Germany, Baccalauréat in France, Diploma de Maturità in Italy, Voorbereidend Wetenschappelijk Onderwijs in the Netherlands, etc.

DATA PROTECTION

Per mitjà d’aquest lloc web es recullen dades de caràcter personal necessàries per a la gestió i manteniment d’alguns dels nostres serveis. EUSES i ENTi compleixen amb la normativa vigent espanyola referent a la protecció de dades.

En compliment del que estableix la Llei Orgànica 15/1999, de 13 de desembre, de protecció de dades de caràcter personal, EUSES i ENTi informen als seus clients i usuaris que les dades personals que li facilitin a través de la pàgina web o d’altres mitjans, seran incloses en un fitxer automatitzat de dades de caràcter personal, creat i mantingut sota la responsabilitat d’EUSES i ENTi, degudament inscrit en l’Agència Espanyola de Protecció de Dades.

La finalitat principal de la creació, existència i manteniment del fitxer és el tractament de les dades de caràcter personal amb la finalitat de poder gestionar la seva alta com a usuari, informar dels cursos, novetats, informacions d’interès, productes o serveis d’EUSES i ENTi a través del compte de correu que ens ha facilitat.

EUSES i ENTi garanteixen la seguretat i confidencialitat de les dades facilitades. D’aquesta manera, es compromet al compliment de la seva obligació de secret de les dades de caràcter personal i al seu deure guardar-los i adoptar totes les mesures necessàries per evitar la seva alteració, pèrdua, tractament o ús no autoritzat.

Tota la informació facilitada és necessària per facilitar la navegació i l’accés als serveis d’EUSES i ENTi i per oferir informació comercial, publicitària i/o promocional del seu interès.

Per al millor compliment dels seus serveis, EUSES i ENTi es troben obligats a facilitar determinades dades dels seus clients (nom, adreça, telèfon, etc.) a altres empreses col·laboradores amb la prestació del servei (servei de manteniment informàtic, entitats financeres, etc.). En tots els casos les dades que es faciliten són les estrictament necessàries per a l’activitat concreta que s’hagi de realitzar. Vostè autoritza expressament la cessió de les seves dades de caràcter personal per a aquesta finalitat si fos necessari per a la correcta gestió dels nostres serveis.

Té el dret en tot moment d’exercitar els drets d’accés , rectificació, cancel·lació i oposició, comunicant-ho per escrit o al correu electrònic physiotherapy@euses.cat

Comunicacions de dades efectuades pel propi Usuari

Abans de facilitar dades personals relatives a terceres persones, l’Usuari haurà d’obtenir el seu previ i exprés consentiment, havent informat dels termes continguts en aquesta Política de privacitat. L’Usuari s’obliga a mantenir indemne a EUSES i ENTi davant qualsevol possible reclamació, multa o sanció que pugui venir obligada a suportar com a conseqüència de l’incompliment per part de l’Usuari del deure descrit en aquest paràgraf.

Ús de Cookies

En compliment a l’art. 22.2 LSSICE s’informa de la utilització de les cookies al lloc web www.euses.cat, propietat d’EUSES i ENTi.

EUSES i ENTi, pel seu propi compte o el d’un tercer contractat per a la prestació de serveis de medicació, poden utilitzar cookies quan l’Usuari navega pel lloc web. Les cookies són fitxers enviats al navegador per mitjà d’un servidor web amb la finalitat de registrar les activitats de l’Usuari durant el seu temps de navegació.

Les cookies utilitzades pel lloc web s’associen únicament amb un usuari anònim i el seu ordinador, de manera que no proporcionen per si mateixes dades personals de l’Usuari.

Mitjançant l’ús de les cookies és possible que el servidor on es troba allotjat el lloc web reconegui el navegador web utilitzat per l’Usuari, amb la finalitat que la navegació sigui més senzilla. S’utilitzen també per a mesurar l’audiència i paràmetres del trànsit, així com per controlar el progrés i nombre d’entrades.

L’Usuari té la possibilitat de configurar el seu navegador per ser avisat de la recepció de cookies i per impedir la seva instal·lació en el seu equip. Si us plau, consulti les instruccions i manuals del seu navegador per ampliar aquesta informació.

Per utilitzar el Lloc Web no resulta necessari que l’Usuari permeti la instal·lació de les cookies enviades pel lloc web, o el tercer que actuï en nom d’EUSES i ENTi.

Enviament de comunicacions comercials

EUSES podrà remetre a l’usuari registrat, o que ho hagi sol·licitat a través del formulari de contacte existent al lloc web www.physiotherapybarcelona.net, comunicacions comercials o informatives per mitjans electrònics, relatives als serveis d’EUSES i ENTi.

EUSES podrà remetre a l’usuari registrat comunicacions informatives o comercials per mitjans electrònics de l’interès de l’usuari.

De la mateixa manera, EUSES i ENTi podran comunicar les dades personals de l’usuari a terceres empreses pertanyents als sectors d’activitat abans indicats, amb la finalitat que aquestes puguin remetre-li comunicacions comercials per mitjans electrònics, relatives als seus productes i serveis.

L’usuari pot negar-se lliurement al fet que els tractaments continguts en aquesta clàusula es duguin a terme, marcant la corresponent casella continguda al formulari de registre d’Usuari.
